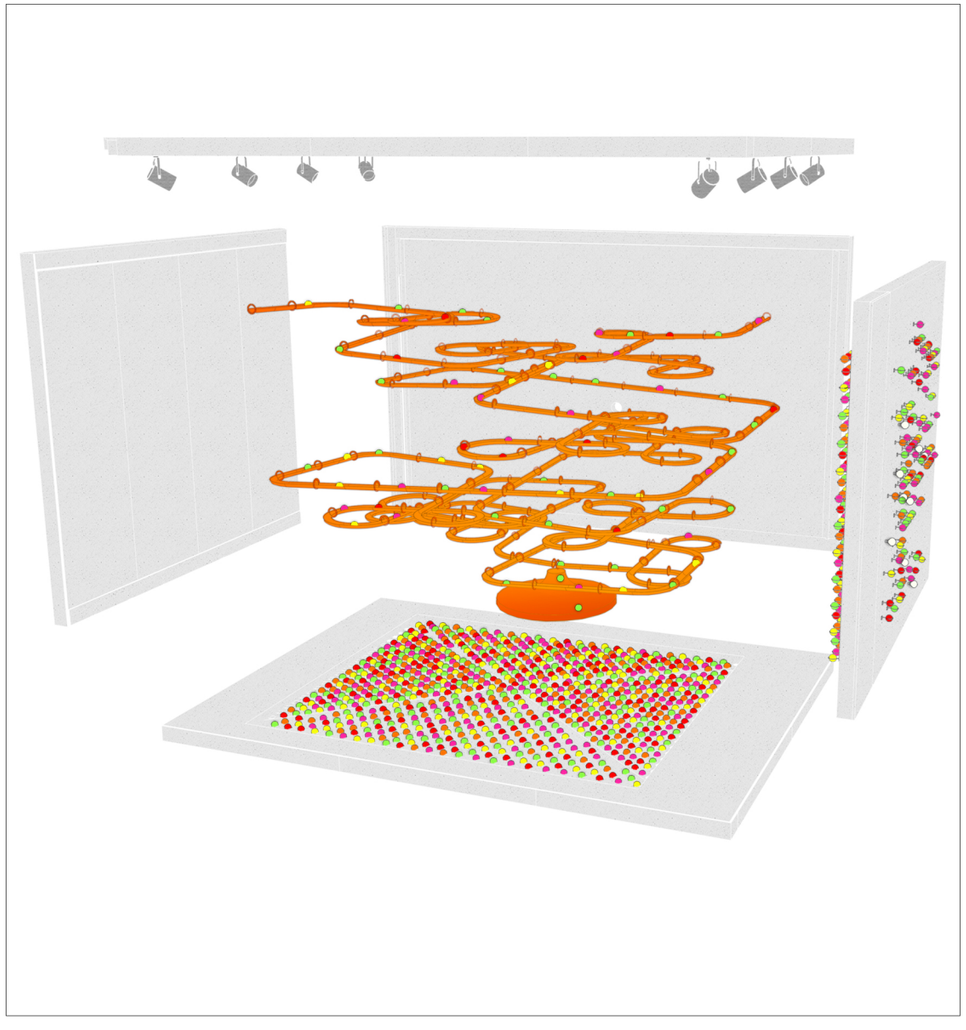
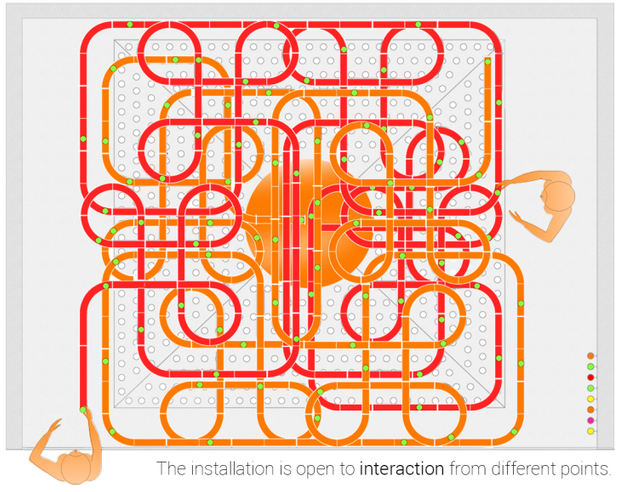
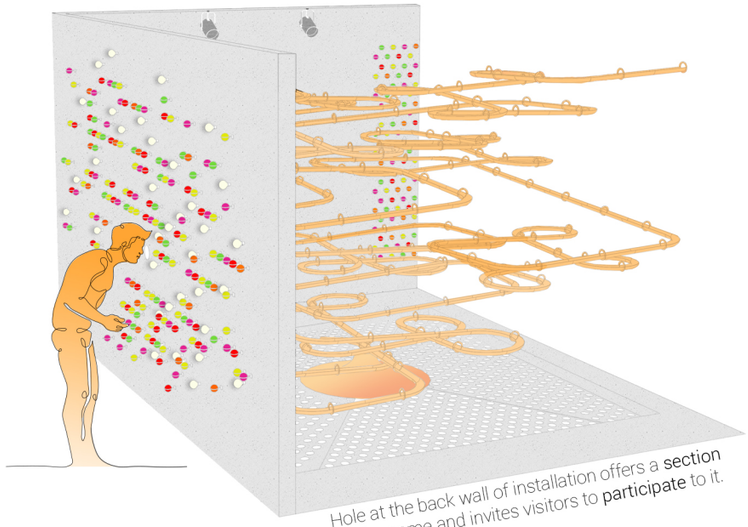
THE PATH



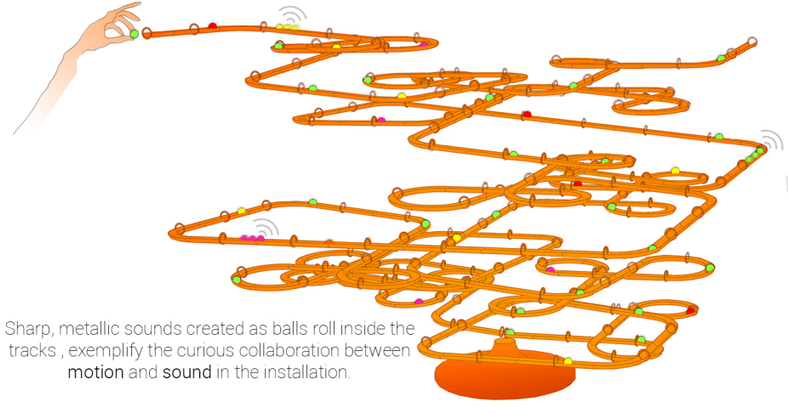
The balls follow **2 different route**s.



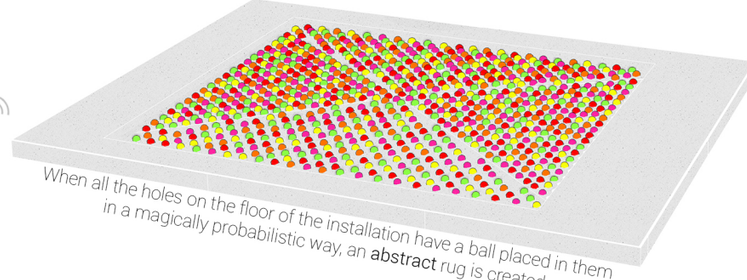
The installation is open to **interaction** from different points.



Hole at the back wall of installation offers a **section** of the game and invites visitors to **participate** to it.



Sharp, metallic sounds created as balls roll inside the tracks , exemplify the curious collaboration between **motion** and **sound** in the installation.



When all the holes on the floor of the installation have a ball placed in them in a magically probabilistic way, an **abstract** rug is created.
