

enia architectes

Founded in Paris in 2003, **enia architectes** is one of the top 60 architecture and design firms in France. Directed by 3 architects from a **multi-disciplinary** background – Simon Pallubicki, Mathieu Chazelle and Brice Piechaczyk - the office is supported by a solid and enthusiastic staff of 50 collaborators from 8 different nationalities.

Our work spans a wide spectrum of building types and across all scales of operation such as cultural facilities, data centers, educational buildings, sport facilities, transport, retails, offices or mixed use programs. In today's carbon-conscious world, we believe that creating **responsible architecture** is foremost about fabricating conditions for harmonious cohabitation, a symbiosis between man and environment constructed from a reasoned economy of resources. Any building, irrespective of its function, size or location, contributes to the quality of the built environment. As such, all buildings merit our attention and effort as architects and designers.

At **enia**, **confronting** this **diversity** with an inquiring and creative spirit is what drives our reflection on each project - exploring places and cultures, embracing complexities and challenging apparent contradictions - in order to uncover the right solution.

Since 2005 **enia architectes** has actively developed our international activity with projects in China, Japan, Africa and Europe. The firm has partnerships in Tunisia, Brazil, Japan and an Indian subsidiary since 2016.

Simon PALLUBICKI

Dob 3 February 1968
Architect DPLG (state qualified)
Cabinetmaker
University of Applied Sciences
Bochum, Germany

PROFESSIONNEL CAREER

- Cabinetmaker, Salta (Argentina)
