DESCRIPTION:

"Scenografie" is a collection of innovative cache pots designed to showcase succulent plants. The design studio founded by Virginia Valentini and Francesco Breganze de Capnist has created a series of original and theatrical pieces of architecture for plants: stage-settings that combine the cache pot and its stand in a single object. LATOxLATO takes inspiration from the rich heritage of Italian art and architecture and reimagines it in an unexpected, contemporary style. The collection includes three pieces.

"**Quinta n. 1**" is an harmonious series of arches creating a deep perspective.

On the boundary between the Romanesque and the Gothic, "**Quinta n. 2**" evokes the geometries of a cathedral.

"**Quinta n. 3**" is a majestic and abstract stairway. All three "stage settings" are specifically designed to show off the quiet presence of succulents.

The mini-architectures are made of laser-cut iron, hand-welded, and painted with powder coatings that are resistant to corrosion, water and aggressive agents. The "Scenografie" collection is also suitable for outdoor use.
