**PRESS RELEASE**

**Discover the latest stove from Stûv America**

**Bromont (Quebec), October 6, 2025** – Stûv America, manufacturer of wood stoves and fireplaces, is proud to unveil the s16-V, a new model designed for lovers of design and authentic warmth.

The fifth member of the s16 family—already recognized and appreciated by wood-burning enthusiasts—the s16-V carries on the tradition of sleek design, showcasing the beauty of the flames while offering an unmatched experience.

Inspired by mid-century aesthetics, the s16-V stands out with its refined, timeless design. Thanks to its adjustable legs, it can be precisely leveled and installed with elegance in any setting.

Like the other members of the s16 family, the s16-V incorporates smart mechanisms that ensure simple, efficient operation. With no visible handle, it offers an unobstructed view of the fire. Its door opens easily with a removable key, while a mobile smoke deflector activates automatically to evacuate smoke and prevent any backflow into the room. No air controls need to be adjusted: simply light the fire and fully enjoy the warmth.

**Three available sizes**

The s16-V is available in three models: 58, 68, and 78, all EPA-certified and fully compliant with current environmental standards.

This new stove is available exclusively in North America.
