

# NENMAR

- **Project Name**

Mansion apartment | London

- **Description**

We are thrilled to announce the completion of our latest project in the heart of London, overlooking Battersea Park. Our goal for this project was to transform a ground-floor flat by completely remodeling the interior, enhancing the flow, and natural light throughout the space.

The design is characterized by a refined palette of just few materials, resulting in a tranquil, simple, yet extremely sophisticated environment. Every detail, from the built-in joinery to the lighting and soft furnishings, has been custom-designed and tailor-made to suit the space and its intended purpose.

Beginning from the entrance, the new layout features a contemporary frame wall molding design, defined by vertical and horizontal natural oak guides. These guides delineate door openings and built-in joinery, setting the rational for the rest of the house. To break the flow, at the end of a corridor, we introduced a striking brushed stainless-steel wall. Behind this wall, a concealed door discreetly hides a red travertine loo.

The living area, a calm and simple space where a monolithic bespoke fireplace carved from a single block of Titanium travertine act as centerpiece. The same travertine connects the living room to the dining/kitchen area through a contemporary arch, creating a seamless continuation of the built-in units.

The sleeping area, characterised by three bedrooms with ensuite bathrooms featuring clay plaster wall and cement floors with white bespoke travertine elements.

The aim was to produce a timeless sophistication using a few carefully selected elements, proving that thoughtful design is the key to crafting enduring spaces.

- **Project Overview**

Location – Battersea, London, UK

Size – 170m<sup>2</sup>

Status – Finished

Sector – Residential

Services – Architecture + Interior Design

- **Material Palette**

Natural Oak

Travertine (white, titanium & red)
