About CBRE Design

CBRE Design (CBRE Netherlands) has been specializing in designing high-profile work environments for over 20 years. With a creative team of (interior) architects, designers and placemakers we design for (international) clients including Asics, Heineken, Wageningen UR, GuerrillaGames, Oracle, Booking.com and also for charity organizations such as Unicef and KiKa.

Our mission is to explore all the potential in working and to improve the vitality of people. By inspiration, creation and engagement we design healthy and holistic contemporary work environments. This creates places where there is room for memorable moments, where the experience of the user is central.
