

Breitenbach Landscape Hotel – 48° Nord

Breitenbach Landscape Hotel proposes a holistic and a true ecotourism experience in Alsace, inspired by Scandinavian traditions and building on the region's culinary, wellness and nature opportunities. Perched on the heights of the Alsatian village of Breitenbach, the landscape hotel 48° Nord reinterprets the traditional Scandinavian hytte, a place of retreat and reconnection with wild nature. At the heart of a protected Natura 2000 site, the project was designed to fit into a preserved setting without ever disturbing it.

A Franco-Danish client, a Norwegian architect, a common attraction for design and natural materials. It was from this exceptional meeting that the 48° Nord project was born. Breitenbach landscape hotel encapsulates daring architecture and design, a spirit of well-being and a sharp culinary culture. By uniting local identity with the landscape through forms still unseen in the region, the architect gave 48° Nord a unique architectural expression.

Location

Breitenbach, France

Client

Private

Type

Landscape, Commercial

Program

Landscape hotel with a main building for reception, restaurant, wellness facility and the director's housing, as well as 14 hytte for hotel guests.
