

CONCEPT

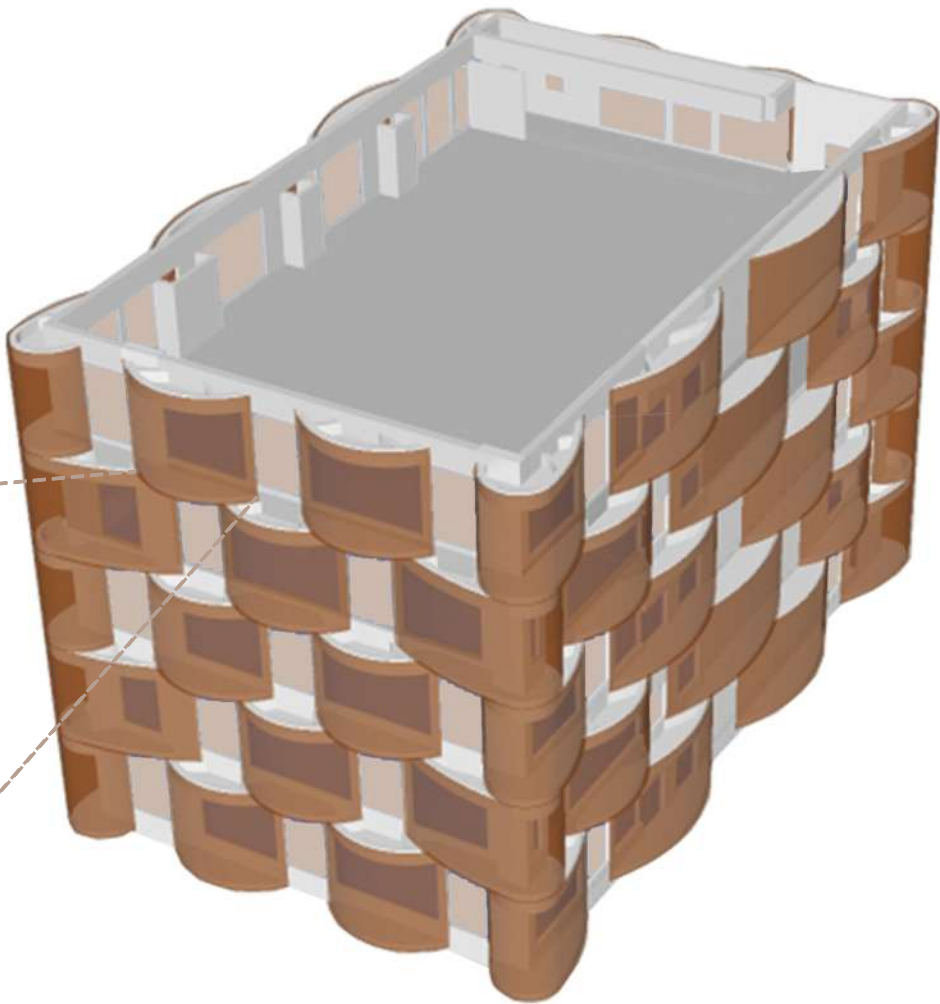

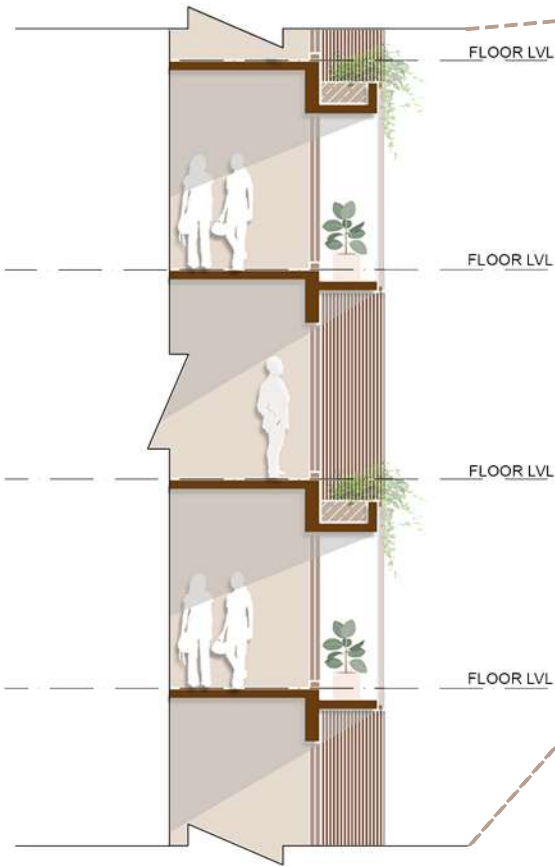

1. Building been built on a small plot with a restricted footprint covering 30% site with an efficient vertical design.

2. The restricted plot size and statutory open space requirements resulted in a vertical configuration.

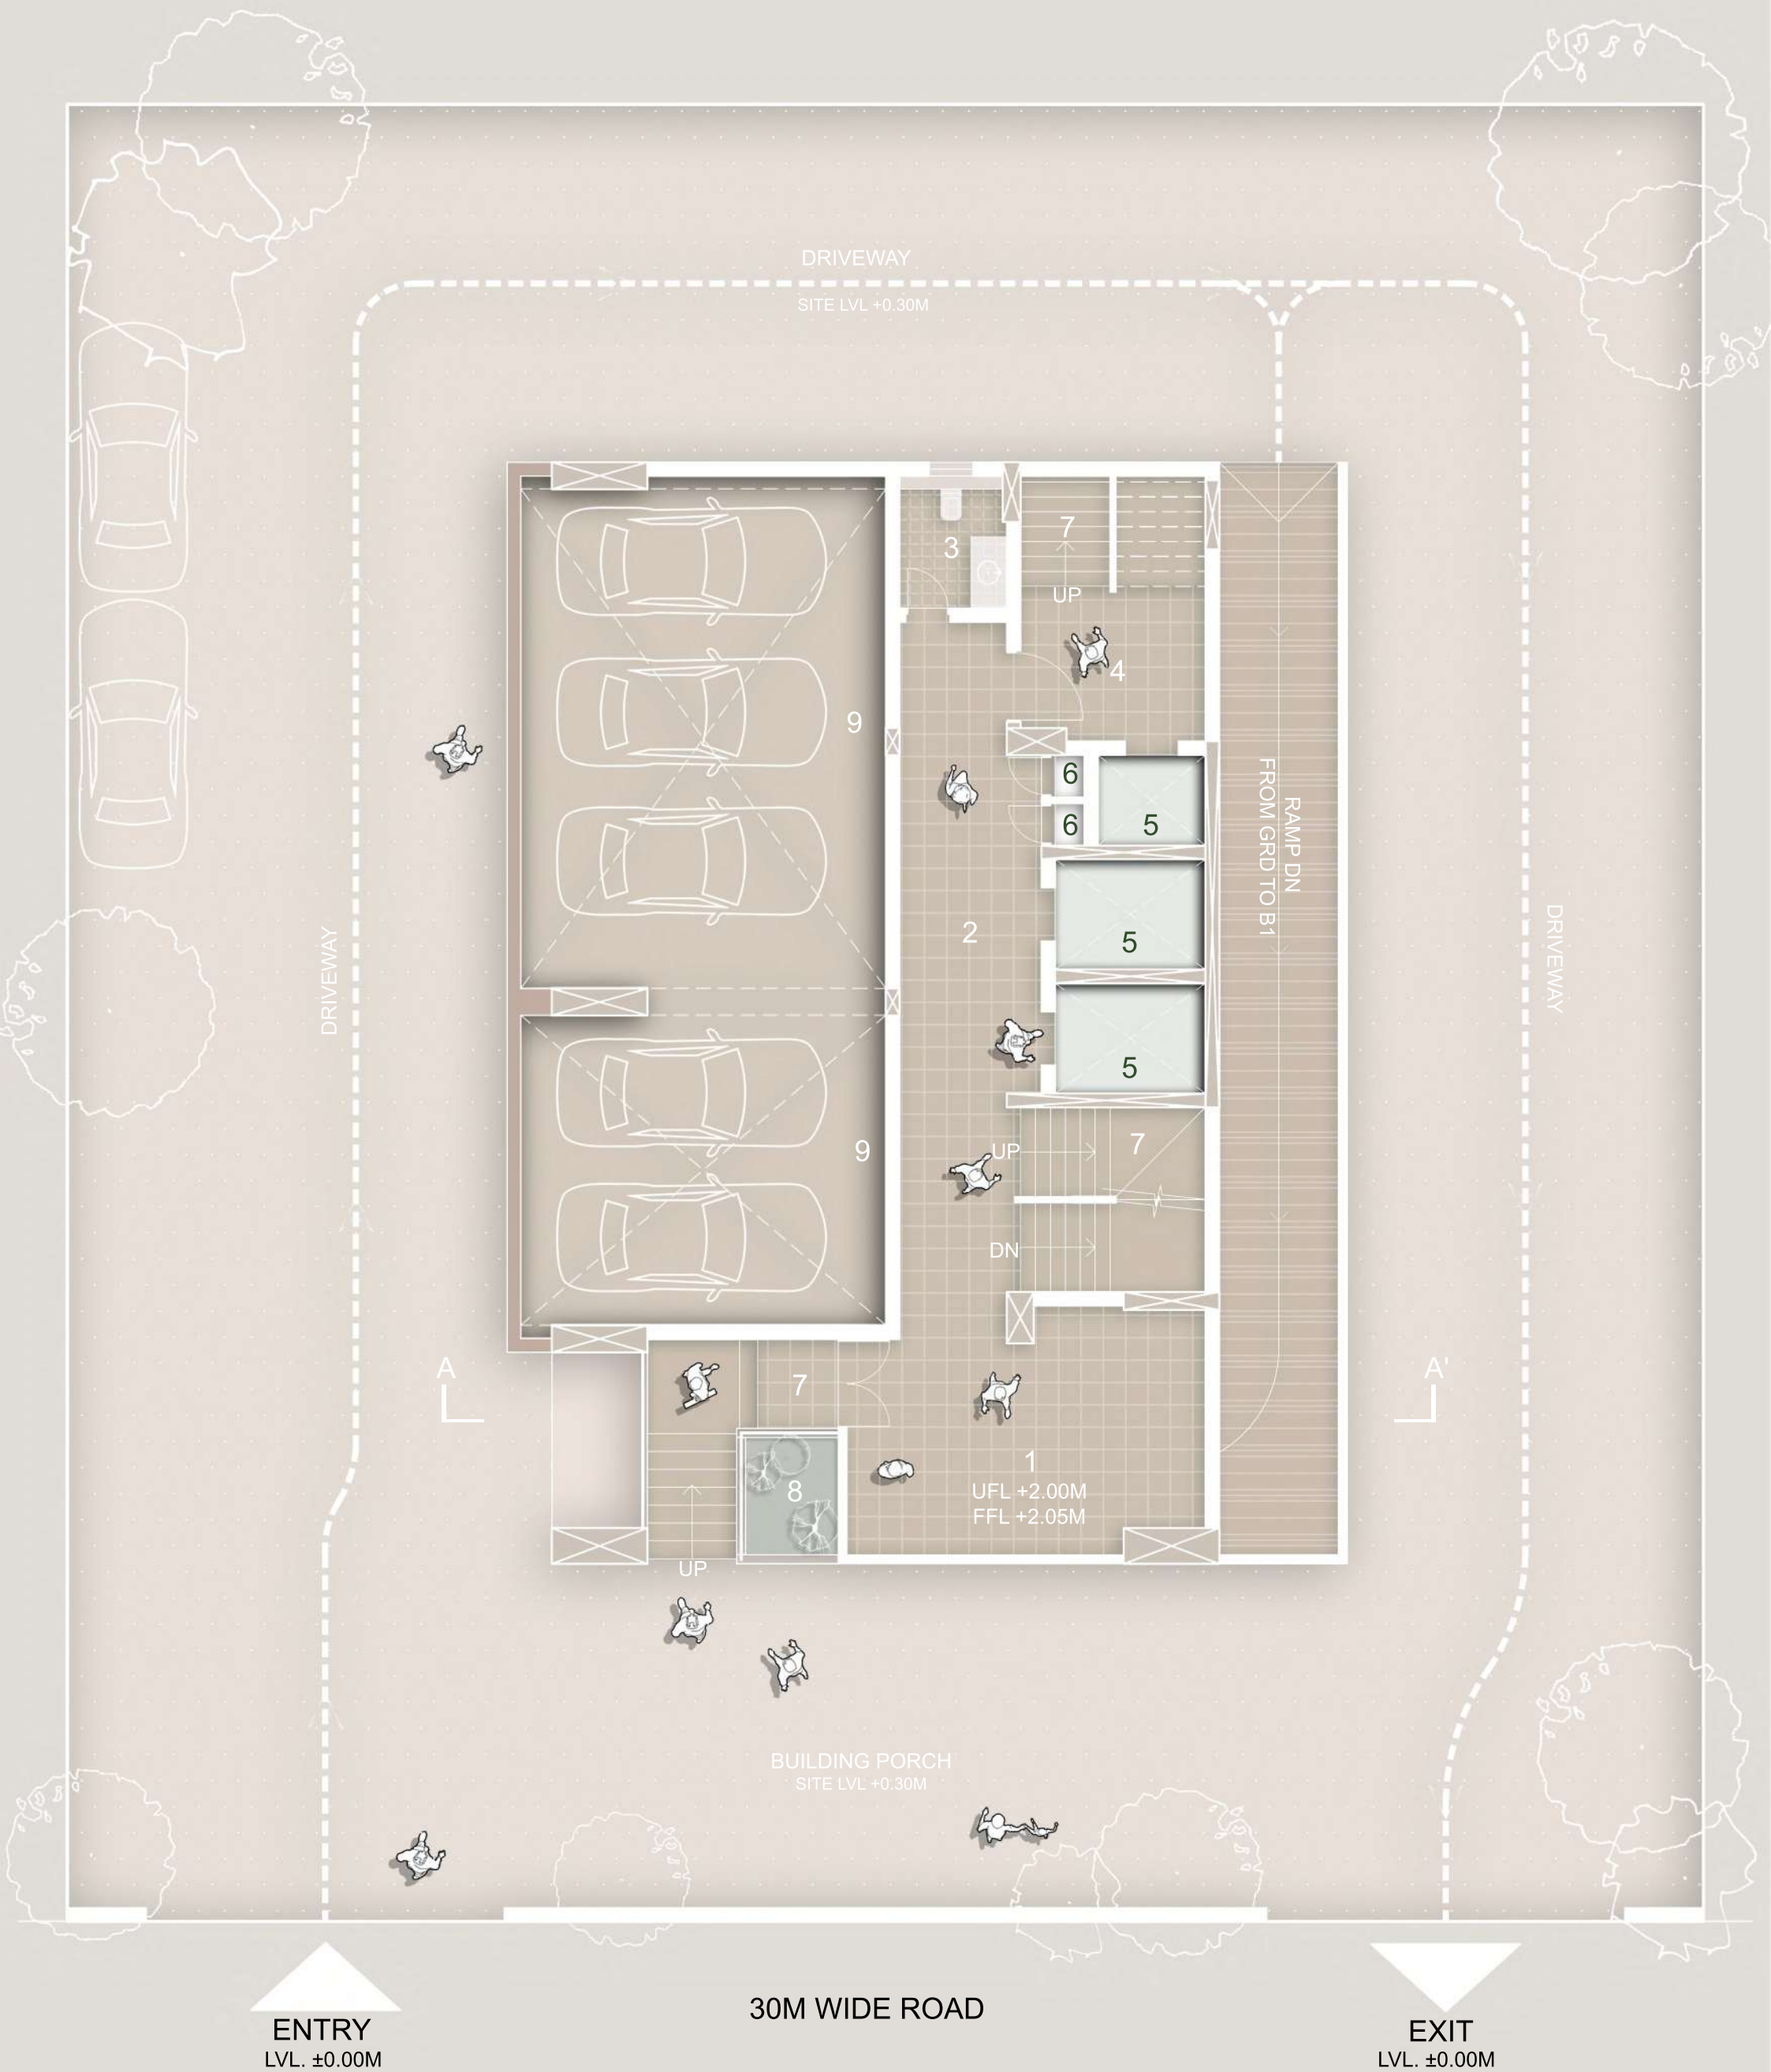

3. Green spaces for natural light and ventilation are added along the entire envelope of the building due to restricted plot size and density .

4. Aluminium screen creates sheltered spaces with indirect sunlight minimizing heat gain and reducing energy consumption.

5. Screens provide space for plantation with sheletered effect of balcony.
